

SOLUTIONS FOR

Heavy-duty equipment manufacturers

PPG TRUEFINISH® industrial coatings deliver an automotive-quality finish and dynamic surface protection for equipment that is powerful enough to move earth, haul gravel or shape concrete. With a series of cutting-edge technologies designed to withstand tough environments, PPG is one of the leading global partners of manufacturers in the heavy-duty and construction equipment market.

Personalized solutions

With our vast portfolio of liquid, powder and pretreatment technologies, your local *PPG TrueFinish* specialist will work closely with your operation to offer solutions that meet your everyday challenges. Based on your unique requirements, we can provide solutions that deliver:

- Thin-film flexibility that does not crack or chip against high impacts
- Excellent exterior protection against weather-related exposure
- Strong abrasion and mar resistance that reduces the need for touch-ups
- Wet-on-wet primer-to-topcoat application that may increase throughput
- The ability to meet many global OEM specifications
- Quick color and gloss customization based on your standards

Local availability and service

We combine our innovative technologies with a local sales and service team that works directly with your business. Your local team can provide quick custom color matching and a local stocking program so you have the products you need, when you need them.

Coatings for

Bulldozers

Cranes

Dump trucks

Excavators

Loaders

We protect and beautify the world™

Our relationships with global leaders in the heavy-duty equipment market have led to world-class technologies engineered to protect against the most aggressive threats your equipment will encounter. The following market-proven solutions are formulated to provide operational versatility while delivering the quality your customers have come to expect.

Recommended Topcoats

GOOD

Spectracron 110 Series

This fast-drying industrial enamel is available in a wide range of custom colors and gloss levels or in nine factory-packed colors that meet the specifications of the leading heavy-duty, construction and agricultural equipment manufacturers in the world.

BETTER

Spectracron 100 Series

Delivering strong performance from a single-component, acrylic-modified alkyd, this topcoat allows you to add an optional catalyst to enhance depth of image, color and gloss retention, and chemical and abrasion resistance.

BEST

Spectracron 360 Series

A two-component, high-solids urethane designed to provide brilliant exterior durability while offering excellent hardness, abrasion and impact resistance.

Spectracron 370 Series

This direct-to-metal acrylic urethane imparts robust UV stability and dynamic surface protection without the need of a primer, increasing manufacturing efficiencies versus two-coat systems.

Spectracron 380 Series

Our advanced POLY-IOTHANE™ coatings technology combines exterior urethane protection with thin-film flexibility and strong corrosion resistance, creating lasting durability in the harshest environments.

Recommended Primers

GOOD

Spectracron 111 Series

Formulated to offer you flexibility, this rust-inhibitive, fast-drying primer is not only compatible with a wide range of topcoats, but is now available in custom colors to increase color consistency and throughput.

BETTER

Spectracron 531 Series

With a 1:1 mix ratio, this high-build primer combines easy application capabilities with tough and durable first-layer epoxy protection.

BEST

Spectracron W43181A Series

A two-component, high-solids, urethane primer designed to produce powerful performance while allowing wet-on-wet applications when paired with one of our Spectracron two-component urethane topcoats.

Our product lines

SPECTRACRON® Coatings

Formulated with advanced resin technologies, our solvent-based liquid primers and topcoats range from quick dry enamels to innovative, two-component urethanes. These products create excellent surface protection over a variety of metal and plastic substrates.

AQUACRON® Coatings

Presenting strong substrate protection where flammability and solvent exposure issues are critical, these waterborne primers and topcoats can offer reduced VOC emissions compared to solvent-based coatings without sacrificing quality or performance.

ENVIROCROn® Coatings

With an in-stock library of over 500 color formulations, a wide range of specialty effects and ultra-durable solutions available, our powder coatings line provides consistently powerful protection.

Pretreatment and Specialty Coatings

The ultimate quality of a finish depends on how well the substrate is prepared. Our pretreatment product line is designed to clean and coat a variety of metal substrates under a wide variety of temperatures.
