

SOLUTIONS FOR

Metal fabricators

With over 130 years of creating cutting-edge technologies, PPG understands what it takes to protect metal substrates. We know about the constant pressure to increase production while decreasing operating costs. Whether you're fabricating for large global OEMs or small local businesses, our PPG TRUEFINISH® industrial coatings can provide unique solutions that protect your products and keep your production line moving.

Personalized solutions

With our vast portfolio of liquid, powder and pretreatment technologies, your local PPG TrueFinish specialist will work closely with your operation to offer solutions that meet your everyday challenges. Based on your unique requirements, we can provide solutions that deliver:

- Anti-corrosive products that defend against rust
- Excellent adhesion over a variety of metal substrates
- Tintable primers and factory-packed topcoats for reliable color consistency
- Wet-on-wet primer-to-topcoat application that may increase throughput
- Product performance and application training that may help achieve applied cost efficiencies
- Quick color and gloss customization based on your standards

Local availability and service

We combine our innovative technologies with a local sales and service team that works directly with your business. Your local team can provide quick custom color matching and a local stocking program so you have the products you need, when you need them.

Coatings for

Shelving and racking

Shielding and cages

Lab and utility cabinets

Electrical enclosures

Industrial equipment

We protect and beautify the world™

Our relationships with global leaders in the metal fabrication market have led to world-class technologies engineered to protect against the most aggressive threats your products will encounter. The following market-proven solutions are formulated to provide operational versatility while delivering the quality your customers have come to expect.

Recommended Topcoats

GOOD

Spectracron 110 Series

This fast-drying industrial enamel is available in a wide range of custom colors and gloss levels or in nine factory-packed colors that meet the specifications of the leading heavy-duty, construction and agricultural equipment manufacturers in the world.

BETTER

Spectracron 300 Series

This two-component urethane enamel combines exterior durability and excellent mar/abrasion resistance to deliver robust surface protection for metal substrates. Its long-lasting color and gloss retention will help keep your products looking new.

Spectracron 550 Series

A two-component, high-solids epoxy enamel engineered to provide durable and reliable protection in rough interior environments.

BEST

Spectracron 360 Series

A two-component, high-solids urethane designed to provide brilliant exterior durability while offering excellent hardness, abrasion and impact resistance.

Recommended Primers

GOOD

Spectracron 111 Series

Formulated to offer you flexibility, this rust-inhibitive, fast-drying primer is not only compatible with a wide range of topcoats, but is now available in custom colors to increase color consistency and throughput.

BETTER

Spectracron 501 Series

This single-component epoxy primer provides better performance and protection than single-component alkyd primers. Formulated for easy-use applications, it offers good filling properties that help hide any surface imperfections.

BEST

Spectracron 531 Series

With a 1:1 mix ratio, this high-build primer combines easy application capabilities with tough and durable first-layer epoxy protection.

Our product lines

SPECTRACRON® Coatings

Formulated with advanced resin technologies, our solvent-based liquid primers and topcoats range from quick dry enamels to innovative, two-component urethanes. These products create excellent surface protection over a variety of metal and plastic substrates.

AQUACRON® Coatings

Presenting strong substrate protection where flammability and solvent exposure issues are critical, these waterborne primers and topcoats can offer reduced VOC emissions compared to solvent-based coatings without sacrificing quality or performance.

ENVIROCROn® Coatings

With an in-stock library of over 500 color formulations, a wide range of specialty effects and ultra-durable solutions available, our powder coatings line provides consistently powerful protection.

Pretreatment and Specialty Coatings

The ultimate quality of a finish depends on how well the substrate is prepared. Our pretreatment product line is designed to clean and coat a variety of metal substrates under a wide variety of temperatures.
