

SOLUTIONS FOR

Waste container manufacturers

At PPG, we understand that coatings for waste containers need to be tough enough to take a beating in severe environments. We also realize that prolonged exposure to waste and dirt makes containers difficult to recoat quickly.

That's why PPG TRUEFINISH® industrial coatings has developed fast-drying, direct-to-metal coatings that offer rust resistance and good adhesion, making them ideal for new or refurbished containers. These tough products will help you coat or recoat your assets and get them into the field quickly.

Personalized solutions

With our vast portfolio of liquid, powder and pretreatment technologies, your local PPG TrueFinish specialist will work closely with your operation to offer solutions that meet your everyday challenges. Based on your unique requirements, we can provide solutions that deliver:

- Single-component, fast-drying formulations that aid in quick turnaround
- Low-VOC, rust-inhibitive protection
- Direct-to-metal application
- Recoatability over marginally prepared substrates
- Water reduction and cleanup
- Options in thirteen popular colors

Local availability and service

We combine our innovative technologies with a local sales and service team that works directly with your business. Your local team can provide quick custom color matching and a local stocking program so you have the products you need, when you need them.

Coatings for

Waste containers

We protect and beautify the world™

Our relationships with global leaders in waste container manufacturing have led to world-class technologies engineered to help protect against the most aggressive threats your products will encounter. The following market-proven solutions are formulated to provide operational versatility while delivering the quality your customers have come to expect.

Recommended Topcoat

Aquacron 440 Series

This direct-to-metal, single-component, fast-drying alkyd enamel coating offers good exterior durability, strong hardness and abrasion resistance. Its durability can be increased when used with a compatible primer.

Recommended Primer

Aquacron 834 Series

This industrial shop primer provides an economical option for manufacturers and custom coaters who need robust protection in corrosive environments. Available in Gray and Red Oxide.

Aquacron 440 topcoat is available in 13 standard colors

| Color | Aquacron 440 |
|--|------------------------------|
|  | Veolia Blue MV440K2184 |
|  | WM Yellow MV440K2185 |
|  | Container Blue MV440K2186 |
|  | WM New Green MV440K2187 |
|  | Ford Blue MV440K2188 |
|  | WM Brown MV440K2189 |
|  | Burgundy MV440K2190 |
|  | Mack Green MV440K2191 |
|  | Brown MV440K2192 |
|  | Container Red MV440K2193 |
|  | Allied Blue MV440K2194 |
|  | Black MV440K2195 |
|  | Bright Green MV440K2196 |

Our product lines

SPECTRACRON® Coatings

Formulated with advanced resin technologies, our solvent-based liquid primers and topcoats range from quick dry enamels to innovative, two-component urethanes. These products create excellent surface protection over a variety of metal and plastic substrates.

AQUACRON® Coatings

Presenting strong substrate protection where flammability and solvent exposure issues are critical, these waterborne primers and topcoats can offer reduced VOC emissions compared to solvent-based coatings without sacrificing quality or performance.

ENVIROCROn® Coatings

With an in-stock library of over 500 color formulations, a wide range of specialty effects and ultra-durable solutions available, our powder coatings line provides consistently powerful protection.

Pretreatment and Specialty Coatings

The ultimate quality of a finish depends on how well the substrate is prepared. Our pretreatment product line is designed to clean and coat a variety of metal substrates under a wide variety of temperatures.
