Removable water-based booth coating protection

Every liquid spray application booth should be protected by a quality removable coating that maintains functionality and cleanliness. PPG’s water-based booth coatings have been developed to lengthen the life of application booths by providing good resistance to solvent enamels — all while delivering excellent strip-ability when new protection is required.

Product Benefits
- Good solvent resistance protects against two-component urethanes and epoxies
- High tensile strength allows users to strip the material in large continuous sheets
- Excellent strip-ability
- Reduce and clean up with water

Why to use
Protects liquid spray booths from daily use
- Lengthens the life of the spray booth
- Keeps the booth bright and clean

How to use
- Apply 10-12 wet mils using standard air spray equipment with a good atomizing head
- Allow 60 minutes of air dry or force cure before using the booth
- To remove, scratch coating and peel
- Peel and reapply as needed
